

NEWTON MANYISA

Project Coordinator | Software Developer

+254 799 425 417 | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Project Coordinator and Full-Stack Software Developer with 2+ years of experience delivering software projects, business system integrations, workflow automation, and IT solutions. Skilled in coordinating technical tasks, managing requirements, testing, troubleshooting, and deployment. Experienced in AI applications, ERPNext customization, API integrations, and automation, with a strong ability to turn business needs into practical technical solutions.

TECHNICAL SKILLS

Web Development & Software Design

Back-End: Python (Flask, Django, Frappe), Node.js, PHP (Laravel)

ERP & Business Systems: ERPNext, Frappe Framework, Zoho Creator, Zoho Forms, Zoho Flow

Automation & Integration: n8n, Webhooks, REST APIs

Front-End: React.js, Next.js, Vue.js, HTML5, CSS3, JavaScript (ES6+), TypeScript, Tailwind CSS

Key Strengths: - Designing responsive, user-focused web interfaces - Customizing ERP modules and business workflows - Automating repetitive processes to improve efficiency

API Integration & Database Management

APIs: RESTful APIs, Third-Party Integrations (Safaricom Daraja, WhatsApp API, Twilio, SMTP, PayPal, TheCocktailDB)

Databases: MySQL, PostgreSQL, Firebase (NoSQL)

Key Strengths: - API development and system integration - Database design, optimization, and management

DevOps, QA & Security

DevOps & Tools: Docker, AWS (Basics), SSH, Git, GitHub

Testing & QA: Debugging, troubleshooting, TDD principles

Security: Basic application security best practices

1

Collaboration & Agile Practices

1. • Agile & Scrum fundamentals (sprint planning, stand-ups, retrospectives)
2. • Documentation using Swagger UI / Flasgger
3. • Team collaboration and mentorship

PROFESSIONAL EXPERIENCE

PROJECT COORDINATION & PROFESSIONAL STRENGTHS

- Project planning and technical task coordination
- Requirements gathering and workflow planning
- Technical implementation and solution delivery
- Project testing, troubleshooting, and deployment
- Stakeholder and technical communication
- Team coordination and collaboration
- AI-powered application development
- Business process automation
- Enterprise system integration
- Technical documentation and problem-solving

Teacher – ICT & Computer Studies

Gracefields International School | 2023 – 2024 - Taught ICT and computer studies to students, focusing on foundational computing concepts and digital literacy. - Guided students through practical lessons on software usage, problem-solving, and basic programming concepts. - Supported students' academic growth through mentorship, assessments, and hands-on projects.

Technical Mentor

Moringa School | 2024 – 2025 - Mentored **5 software development students** over a three-month period. - Provided guidance on HTML, CSS, JavaScript, React, and software development best practices. - Reviewed projects, conducted code reviews, and offered constructive technical feedback. - Coached mentees on career preparation, CV building, portfolio development, and interview readiness.

PROJECTS

AI-Powered Water Treatment Quotation Generator

Project Live Link: <https://www.wari.norwawater.com/>

- Managed and coordinated the development of an AI-powered solution for automating water treatment proposals and quotations.
- Coordinated project requirements, development activities, testing, troubleshooting, and deployment of the application.
- Designed and implemented a workflow that allows users to upload water analysis reports as PDF documents or text for AI-assisted processing.
- Coordinated the integration of OCR, AI models, document processing, and automated quotation generation.
- Ensured the system generated downloadable quotations in PDF and Word formats according to the required business workflow.
- Coordinated testing and refinement of the system to improve reliability and usability.
- Delivered a solution designed to reduce quotation preparation time from approximately five hours to under ten minutes.
- Technologies: Python, Flask, Hugging Face, Ollama, JavaScript, OCR, Docker, Hostinger.

Norwa Africa Website | [Live Link](#) | [GitHub](#)

- **Project Coordination:** Facilitated and coordinated the development of the website from initial requirements and planning through implementation, chatbot development, testing, and deployment.
- **Front-End:** Coordinated the development of a responsive React-based interface for showcasing Norwa Africa's water treatment projects and products.
- **Back-End:** Coordinated backend development using Flask and RESTful APIs to support application functionality and data integration.
- **Database:** Managed the integration of PostgreSQL for users, products, and transaction-related data.
- **Chatbot Development:** Facilitated the integration and development of a website chatbot to improve customer engagement and provide users with automated assistance.
- **Testing & Deployment:** Coordinated testing, troubleshooting, refinement, and final deployment of the complete website and chatbot solution on cPanel.
- **Technologies:** React, Flask, REST APIs, PostgreSQL, Chatbot/AI Integration, cPanel.

EDUCATION

Moringa School – Full-Stack Web Development Certificate | 2025

University of Nairobi – Bachelor of Science in Computer Science | 2019 – 2022

Second Class Honors (Upper Division)

Relevant Coursework: Data Structures, Algorithms, Web Development, Database Systems

VOLUNTEER & LEADERSHIP EXPERIENCE

Open-Source Contributor

GitHub / Open-Source Projects | Jan 2024 – Present - Contribute to JavaScript and web-based projects by fixing bugs, improving features, and enhancing documentation. - Collaborate with global developer communities through GitHub issues, pull requests, and code reviews.
